first of all its a great little radio
second you can order it from the radio shack store
in texas for 225.00 any day of the week.
third yes the larger packs for icom work.

To: ham-equip@ucsd.edu

Hello,

I was wondering how other owners of hw-8 like their rigs. I enjoy mine alot for listening and copying code though due to the fact I live in an apartment I haven't been able to put up a transmitting antenna.

I'll be moving in a month to a place where I'll be able to put a good antenna. Could someone point me in the right direction for building a good antenna for the hw-8.

I would like to build an antenna or antennas that would let me.

Transmit on 40

be portable (camping use) (backpacking)

So this could be 1 or 2 antennas I guess.

I have the ARRL antenna book which has good (I guess) plans for a dipole which is simple and in my skill range.

What has been your expiriance?

Thanks,

-

well i just got my icom and sold my ts 440
gee wish i had the 440 back. the stock filters
in the 737a for ssb are wide as a house. the service
rep at icom suggested the 737 over the 765 when i called
can you believe it. if you decide to get rid of 440 let me
know.

Subject: wanted: Icom remote control software
To: ham-equip@ucsd.edu

Wanted: Icom remote control software to take advantage of the CI-V interface of my Icom radios. (Yup plural) No Kenwoods or Yaesu stuff, just a pair of IC-761's and an IC-735.

Happy as a clam with them but I'd like to play with the remote.

Commercial packages as well as shareware and/or stuff available via ftp is all welcome.
